

Technical Data

Shredder | Series | UZ 80

Transport Dimension	l/w/h	1540/1050/950
---------------------	-------	---------------

Engine

Operational voltage / Frequency / Amperage		480(420V) / 50Hz / 81(76)
maximum performance	kW	75
Efficiency class		according to the actual applicable regulations
Nominal rotation speed	rpm	1484
maximum Torque	Nm	412
Protection class		IP55

Carriage

hole size of fixing screw (see picture above)		845x465 (6 screws)
Total Weight	kg	1200

Rotor

Weight equipped	kg	approx. 330
Width	mm	750
Diameter	mm	775
Rotation speed	rpm	1484
Flails	piece	12
Flail weight	kg	approx. 3,5

Rakes

manual adjustable by screws

Outputs

Green Waste	m ³ /h	up to 15
-------------	-------------------	----------

Configuration

Stationary operation, in- and output by conveyor belt	•
Electrical connection must be provided by the customer	•

· Serie ° Option
